Subject: Columbia TMDL - Some plots
Attachments: Current_Standards_&_Temperatures.ppt

All -

I returned after the meeting and found the attached, dated a couple years ago, after some of the standards changes. This also includes the Grand Coulee graph I was scribbling today. Something like this might work for introducing the problem at the meeting (?). We have plenty of info from the original TMDL as well.

Also, at some point, John and I will need to brief you on the Hells Canyon Complex temp control structure story. It's quite interesting.

-BC
